Discussion on UAS Activities in Mozambique Emergency Response in 2019 presented by WFP, Patrick McKay and Sofia Rosa

Please find the slide for the presentation [here](#) and follow [the recording](#) for more details (from minute 2:23 – 38:20)

In 2019 two cyclones Idai and Kenneth hit Mozambique and WFP deployed drones in the emergency response.

Cyclone Idai occurred first March and the main tasks that WFP took part of:

- Coordination
- Search and Rescue

- Assessment (damage, logistics, line of sight)
- Mapping
- Communication footage.

Later, in April cyclone Kenneth took place and the main tasks that WFP took part of:

- Coordination
- Search and Rescue
- Assessment (damage, logistics)
- Mapping

For more details on the outcomes of the activities please follow [the recording](#) (8:45 – 15:00)

Licungo River Mapping Project

The main objective of the project was to map the most vulnerable communities of Licungo and produce flood hazard maps for each community through collecting digital elevation models. WFP spent four weeks on the field, the first week was aimed on training the participants on how to optimally fly the SenseFly drones

For more details please follow the recording (from minute 16:50 – 26:20)

*** Video of a drone taking off is on minute 35:29*

Next TWG meeting is on **2 of June, 2021**.
