Introducing new members to the group

Presentation by Clare Jones, CCO of what3words

Please find the presentation slide [here](#) and follow the [recording](#) for more details (minute 0:50 – 30:15)

What3words was created as the street addresses can be inaccurate enough to specify precise locations, such as building entrances, and don't exist for parks and many rural areas which makes it hard to find places and prevents people from describing exactly where help is needed in an emergency.

- GPS coordinates can solve this issue but it can be complex for some people.
- What3words have divided the world map into 57 trillion squares (3X3 meter square) and every single square has been preassigned an address with three words from the dictionary.
- What3words work in 48 languages.
- What3word works offline.

\*\* for Q&A please follow [the recording](#) from minute 15:30 to 30:15.

Operator deployment toolkits- Progress so far:

WFP will take the lead on creating the toolkit and revert back to the group in 2-3 months.

Suggestions for TWG work streams

Will the Technical Working Groups act as an educational forum or will it be a group that wants to get out documents and products? Please feel free to contact Jo or Olivier with your opinion and input.

**Next TWG meeting is on 09<sup>th</sup> of June 2021.**
